ARTICLE 8 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators performed in line with expectations with the portfolio adhering to the overall UN Global Compact principles and science-based-emission targets.

More specifically, issuers were excluded if they were deemed to have failed to comply with the UNGC Principles (which cover matters including human rights, labour, corruption and environmental pollution). In addition, the Investment Manager actively engaged with companies to encourage the adoption of science-based emission targets, or a verified commitment to adopt science-based emissions targets, as defined by the Science Based Target Initiative. The Investment Manager committed a minimum of 10% of companies within the portfolio having approved or committed targets and monitored the progress of those companies against those targets. As at 30 June 2024, around 58% of portfolio companies had either committed or approved science-based emissions targets. The Investment Manager also excluded direct investment in Prison Real Estate Investment Trusts (REITS).

The fund also adhered to the Firmwide Exclusions Policy as it did not make any direct investments in the companies involved in the current manufacture of, or minority shareholding of 20% or more in a manufacturer of controversial weapons.

...and compared to previous periods?

Comparison against the period ending June 2023;
Compared to previous periods, the sustainability indicators performed in line with expectations with the portfolio adhering to the overall UN Global Compact principles as well as the ESG exclusionary screens and screens to avoid investment in certain high carbon activities. At the end of the previous period 30 June 2023, around 48% of portfolio companies had either committed or approved science-based emissions targets.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This section is not applicable, the fund does not invest in Sustainable Investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This section is not applicable, the fund does not invest in Sustainable Investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

This section is not applicable, the fund does not invest in Sustainable Investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation and EU Taxonomy Regulation (continued)

ARTICLE 8 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This section is not applicable, the fund does not invest in Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAIs are considered at the product level. As at the date of this disclosure, the Investment Manager considers the following principal adverse impacts on sustainability factors ('PAIs'):

Principal Adverse Impact	How is PAI considered?
GHG Emissions	Through engagement with companies
Carbon Footprint	Through engagement with companies
GHG Intensity of Investee Companies	Through engagement with companies
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Exclusionary screens

ARTICLE 8 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This section is not applicable, the fund does not align with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No:

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

This section is not applicable, the fund does not align with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This section is not applicable, the fund does not align with the EU Taxonomy or hold sustainable investments.

What was the share of socially sustainable investments?

This section is not applicable, the fund does not hold sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Other assets may include cash or cash equivalents in addition to instruments held for the purposes of efficient portfolio management e.g. temporary holdings of index derivatives. No minimum environmental or social safeguards are applied to such investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

No exclusionary screens or other binding commitments were actively breached by the fund and compliance pre-trade controls have been applied to ensure adherence to the ESG exclusionary screens.

How did this financial product perform compared to the reference benchmark?

This section is not applicable, the fund does not use a reference benchmark to attain its environmental or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
