

Product name : **Carmignac Portfolio Emerging Patrimoine**

Legal identity identifier : 5493009DHKYYWDLT418

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made sustainable investments with an environmental objective: __%

☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.69% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made sustainable investments with a social objective: __%

☐ It promoted E/S characteristics, but did not make any sustainable investments

Data as of 31/12/2025

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by applying a best-in-universe approach to invest in a sustainable manner: 1) ESG integration, 2) Negative screening, 3) Positive screening applying a UN SDG alignment approach, 4) Active Stewardship to promote Environment and Social characteristics, 5) Monitoring of Principal Adverse Impacts.

No breach of environmental and social characteristics promoted have been identified during the year.

How did the sustainability indicators perform?

This Sub-Fund has used the following sustainability indicators to measure the attainment of each of the environmental or social characteristics promoted :

1) The coverage rate of ESG analysis: ESG integration through ESG scoring using Carmignac's proprietary ESG platform "START" (System for Tracking and Analysis of a Responsible Trajectory) is applied to at least 90% of issuers. In 2025, the coverage rate of ESG analysis was 99.77% of issuers (excluding cash and derivatives), on average, based on 4 quarters ends data.

2) Amount the universe is reduced by (minimum 20% for the equities and corporate bonds section of the portfolio):

i) Firm-wide exclusion: Negative screening and exclusions of unsustainable activities and practices are identified using an international norms and rules-based approach on the following: (a) controversies against the OECD business guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and UN Global compact principles, (b) controversial weapons, (c) thermal coal mining, (d) power generation companies, (e) tobacco, (f) adult entertainment.

ii) Fund-specific negative screening : Extended activity or stricter exclusion criteria cover gambling, alcohol, companies involved in factory farming, palm oil and companies on the People for the Ethical Treatment of Animals ('PETA') list. In addition, corporate bonds with an overall START rating of "D" or "E" (rating from 'E' to 'A') are excluded of the Sub-Fund's investment universe.

Companies having a START rating of E (rating from 'E' to 'A') on environmental or social pillars are excluded of the Sub-Fund's investment universe. Companies having an overall MSCI rating of 'CCC' or 'B' (rating from 'C' to 'AAA') are a priori excluded of the Sub-Fund's investment universe. Companies rated "CCC" or 'B' on the overall MSCI rating (from "E" to "A") can reintegrate into the Sub-Fund's investment universe if START rating is C or above. The equity universe is further reduced by extended activity or stricter exclusion criteria cover oil and gas, power generation, thermal coal mining, weapons and the number of companies deemed not aligned according to our SDG alignment assessment, as described above.

In 2025, the universe was reduced by 28.80% (for the equity section) and 23.12% (for the bonds section) of the portfolio, on average, based on 4 quarters ends data.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

3) Positive screening (Sustainable Investments): the Sub-Fund makes sustainable investments whereby a minimum of 10% of the Sub-Fund's net assets are invested in shares of companies that are considered aligned with relevant United Nations Sustainable Development Goals. The minimum levels of sustainable investments with environmental and social objectives are respectively 1% and 3% of the Sub-Fund's net assets.

Alignment is defined for each investment / investee company by meeting at least one of the following three thresholds:

a) Products and services: derive at least 50% of their revenue from goods and services that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or

b) Capital expenditure: invest at least 30% of their capital expenditure in business activities that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or

c) Operations:

i. the company achieves an "aligned" status for operational alignment for at least three (3) out of all seventeen (17) of the SDGs, based on the evidence provided by the investee company of available policies, practices and targets addressing such SDGs. An "aligned" status represents an operational alignment score of ≥ 2 (on a scale of -10 to +10) as determined by the external scoring provider; and

ii. the company does not achieve a "misaligned" status for operational alignment for any SDG. A company is considered "misaligned" when its score is ≤ -2 (on a scale of -10 to +10), as determined by the external scoring provider.

These thresholds represent a significant intentionality of the company in regards to the contributing activity. For further information on the United Nations Sustainable Development Goals, please refer to <https://sdgs.un.org/goals>.

In 2025, 43.69% of the Sub-Fund's net assets were invested according to this positive screening, on average, based on 4 quarters ends data. The levels of sustainable investments with environmental and social objectives were respectively 23.21% and 20.48% of the Sub-Fund's net assets, on average, based on 4 quarters ends data.

4) Active stewardship: Environmental and social related company engagements leading to improvement in companies sustainability policies have been measured by following indicators: (a) level of active engagement and voting policies, (b) number of engagements, (c) rate of voting and (d) participation at shareholder and bondholder meetings).

In 2025, the active stewardship indicators achieved the following: a) case study example is listed in the section "what actions have been taken to meet the environmental and/or social characteristics during the reference period?", b) 111 engagements were conducted at Carmignac level and 10 engagements at the Sub-fund level, c) we voted at 100% of the shareholders meetings of this Sub-Fund, and d) we participated in ~96% of the shareholders meetings we were eligible for at firm-level.

5) Principal adverse impacts: Furthermore, this Sub-Fund is committed to applying the SFDR level II 2019/2088 Regulatory Technical Standards (RTS) annex 1 related to Principal Adverse Impacts whereby 14 mandatory and 2 optional environmental and social indicators (selected by the Sustainable Investment team for pertinence and coverage) will be monitored to show the impact of such sustainable investments against these indicators: Greenhouse gas emissions, Carbon footprint, GHG intensity (investee companies), Exposure to companies in fossil fuel sector, Non-renewable energy consumption and production, Energy consumption intensity per high-impact climate sector, Activities negatively affecting biodiversity-sensitive areas, Emissions to water, Hazardous waste ratio, Water usage and recycling (optional choice), Violations of UN Global Compact principles or OECD Guidelines for Multinational Enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact and OECD Guidelines for Multinational Enterprises, Unadjusted gender pay gap, Board gender diversity, Exposure to controversial weapons, Excessive CEO pay ratio (optional choice). Sovereign bond issuers are monitored for Social violations and GHG intensity indicators.

Please find below the performance of the principal adverse impacts indicators for the year 2025, based on average quarter-end data, for the equity and corporate bond portions of the portfolio:

PAI Indicators	Based on company reported	Fund	Coverage
GHG Scope 1	Scope 1 GHG emissions	9,457.56	94.22%
GHG Scope 2	Scope 2 GHG emissions	1,997.07	94.22%
GHG Scope 3	From 1 January 2023, Scope 3 GHG emissions	59,799.50	94.68%
Total GHG	Total GHG emissions	76,882.68	94.22%
Carbon footprint	Carbon footprint	610.63	94.22%
GHG intensity	GHG intensity of investee companies	1,026.55	94.22%
Exposure to fossil fuels	Share of investments in companies active in the fossil fuel sector	9.20%	94.22%
Non-renewable energy consumption and production	Share of non-renewable energy consumption and production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	80.80%	94.74%
Energy consumption intensity - Total	Energy consumption in GWh per million EUR of revenue of investee companies - Total	5.89 GWh/Meur	93.85%
Energy consumption intensity - NACE Sector A	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector A (Agriculture, forestry and fishing)	0.00	93.85%
Energy consumption intensity - NACE Sector B	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector B (Mining and quarrying)	144.25	93.85%
Energy consumption intensity - NACE Sector C	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector C (Manufacturing)	47.27	93.85%
Energy consumption intensity - NACE Sector D	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector D (Electricity, gas, steam and air conditioning supply)	290.00	93.85%
Energy consumption intensity - NACE Sector E	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector E (Water supply; sewerage; waste management and remediation activities)	0.00	93.85%
Energy consumption intensity - NACE Sector F	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector F (Construction)	0.00	93.85%
Energy consumption intensity - NACE Sector G	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector G (Wholesale and retail trade; repair of motor vehicles and motorcycles)	6.56	93.85%
Energy consumption intensity - NACE Sector H	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector H (Transporting and storage)	0.50	93.85%
Energy consumption intensity - NACE Sector L	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector L (Real estate activities)	100.00	93.85%
Biodiversity	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	17.67%	94.45%
Emissions to water	Tons of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.01 t/Meur	24.53%
Hazardous waste	Tons of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	0.46 t/Meur	94.74%
Water usage and recycling	Average amount of water consumed and reclaimed by the investee companies (in cubic meters) per million EUR of revenue of investee companies	0.01 t/Meur	24.53%
Violations of UNGC/OECD	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%	95.83%
Processes to monitor UNGC / OECD compliance	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%	94.74%
Gender pay gap	Average unadjusted gender pay gap of investee companies	11.27%	87.56%
Board gender diversity	Average ratio of female to male board members in investee companies	24.24%	94.45%
Controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%	95.13%
Excessive CEO pay ratio	Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual)	577.43	44.73%
Greenhouse gas intensity (sovereign and supranational)	GHG intensity of investee countries (tons of CO2e emissions per million EUR of the country's GDP)	692.01	95.84%
Social violations (sovereign and supranational)	Number of investee countries subject to social violations (as an absolute number and in proportion to the total number of countries receiving investments), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0	95.84%

...and compared to previous periods?

This Sub-Fund has used the following sustainability indicators to measure the attainment of each of the environmental or social characteristics promoted :

1) The coverage rate of ESG analysis: ESG integration through ESG scoring using Carmignac's proprietary ESG platform "START" (System for Tracking and Analysis of a Responsible Trajectory) has been applied to more than 90% of issuers. In 2024, the coverage rate of ESG analysis was of 98.3% of issuers, on average, based on 4 quarters ends data.

2) Amount the universe is reduced by (minimum 20% of the equities and corporate bonds section of the portfolio):

i) Firm-wide: Negative screening and exclusions of unsustainable activities and practices are identified using an international norms and rules-based approach on the following: (a) controversies against the OECD business guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and UN Global compact principles, (b) controversial weapons, (c) thermal coal mining, (d) power generation companies, (e) tobacco, (f) adult entertainment.

ii) Fund-specific: : Extended activity or stricter exclusion criteria cover oil and gas, weapons, gambling, alcohol, power generation, thermal coal mining, companies involved in factory farming, palm oil and companies on the People for the Ethical Treatment of Animals ('PETA') list. In addition, corporate bonds with an overall START rating of "D" or "E" (rating from 'E' to 'A') are excluded of the Sub-Fund's investment universe. Companies having a START rating of E (rating from 'E' to 'A') on environmental or social pillars are excluded of the Sub-Fund's investment universe. Companies having an overall MSCI rating of 'CCC' or 'B' (rating from 'C' to 'AAA') are a priori excluded of the Sub-Fund's investment universe. Companies rated "CCC" or 'B' on the overall MSCI rating (from "E" to "A") can reintegrate into the Sub-Fund's investment universe if START rating is C or above. The equity universe is further reduced by the number of companies deemed not aligned according to our SDG alignment assessment, as described below.

In 2024, the universe was reduced by 32.6% (for the equity section) and 25.3% (for the corporate bonds section) of the portfolio, on average, based on 4 quarters ends data.

3) Positive screening (Sustainable Investments): The Sub-Fund makes sustainable investments whereby a minimum of 10% of the Sub-Fund's net assets are invested in shares of companies that are considered aligned with relevant United Nations Sustainable Development Goals. The minimum levels of sustainable investments with environmental and social objectives are respectively 1% and 3% of the Sub-Fund's net assets.

Alignment is defined for each investment / investee company by meeting at least one of the following three thresholds:

a) Products and services: the company derives at least 50% of its revenue from goods and services that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or

b) Capital expenditure: the company invest at least 30% of their capital expenditure in business activities that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or

c) Operations:

i. the company achieves an "aligned" status for operational alignment for at least three (3) out of all seventeen (17) of the SDGs, based on the evidence provided by the investee company of available policies, practices and targets addressing such SDGs. An "aligned" status represents an operational alignment score of ≥ 2 (on a scale of -10 to +10) as determined by the external scoring provider; and

ii. the company does not achieve a "misaligned" status for operational alignment for any SDG. A company is considered "misaligned" when its score is ≤ -2 (on a scale of -10 to +10), as determined by the external scoring provider. In 2024, 15.0% of the Sub-Fund's net assets were invested in sustainable investments, on average, based on an average at the end of each quarter. The levels of sustainable investments with environmental and social objectives were respectively 7.6% and 7.4% of the Sub-Fund's net assets, in 2024, on average, based on an average at the end of each quarter. In 2024, 64.5% had a sustainability score of 3/5, and 95.7% have a sustainability score of 2.6/5, on average, based on an average at the end of each quarter. The proportion of green, social or sustainability-linked bonds was 1.7% on average, calculated based on 4 quarters' end data.

4) Active stewardship: Environmental and social related company engagements leading to improvement in companies sustainability policies have been measured by the following indicators: (a) level of active engagement and voting policies, (b) number of engagements, (c) rate of voting and (d) participation at shareholder and bondholder meetings). In 2024, we conducted 70 engagements with 54 companies and 1 sovereign entity at Carmignac level, and 8 companies at the Sub-Fund level. At Sub-Fund level, we voted for 100% of the meetings where we have shareholder or bondholder rights to exercise.

5) Principal Adverse Impacts: the Sub-Fund has applied the SFDR level II 2019/2088 Regulatory Technical Standards (RTS) annex 1 whereby 16 mandatory and 2 optional environmental and social indicators have been monitored to show the impact of such sustainable investments against these indicators : Greenhouse gas emissions, Carbon footprint, GHG intensity (investee companies), Exposure to companies in fossil fuel sector, Non-renewable energy consumption and production, Energy consumption intensity per high-impact climate sector, Activities negatively affecting biodiversity-sensitive areas, Emissions to water, Hazardous waste ratio, Water usage and recycling (optional choice), Violations of UN Global Compact principles or OECD Guidelines for Multinational Enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact and OECD Guidelines for Multinational Enterprises, Unadjusted gender pay gap (optional choice), Board gender diversity, Exposure to controversial weapons, Excessive CEO pay ratio. Sovereign bond issuers are monitored for Social violations and GHG intensity indicators. Please find below the performance of the principal adverse impacts indicators for the year 2024, based on average quarter-end data, for the equity and corporate bond portions of the portfolio:

PAI Indicators	Based on company reported	Fund	Coverage
GHG Scope 1	Scope 1 GHG emissions	10,982.42	93.70%
GHG Scope 2	Scope 2 GHG emissions	1,932.76	93.70%
GHG Scope 3	From 1 January 2023, Scope 3 GHG emissions	90,528.51	93.70%
Total GHG	Total GHG emissions	98,120.03	93.70%
Carbon footprint	Carbon footprint	742.31	93.70%
GHG intensity	GHG intensity of investee companies	1,064.90	93.70%
Exposure to fossil fuels	Share of investments in companies active in the fossil fuel sector	13.14%	93.70%
Non-renewable energy consumption and production	Share of non-renewable energy consumption and production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	79.65%	93.15%
Energy consumption intensity - Total	Energy consumption in GWh per million EUR of revenue of investee companies - Total	5.47 GWh/Meur	93.70%
Energy consumption intensity - NACE Sector A	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector A (Agriculture, forestry and fishing)	0.00	93.70%
Energy consumption intensity - NACE Sector B	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector B (Mining and quarrying)	121.15	93.70%
Energy consumption intensity - NACE Sector C	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector C (Manufacturing)	30.31	93.70%
Energy consumption intensity - NACE Sector D	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector D (Electricity, gas, steam and air conditioning supply)	290.00	93.70%
Energy consumption intensity - NACE Sector E	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector E (Water supply; sewerage; waste management and remediation activities)	0.00	93.70%
Energy consumption intensity - NACE Sector F	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector F (Construction)	0.00	93.70%
Energy consumption intensity - NACE Sector G	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector G (Wholesale and retail trade; repair of motor vehicles and motorcycles)	5.18	93.70%
Energy consumption intensity - NACE Sector H	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector H (Transporting and storage)	0.00	93.70%
Energy consumption intensity - NACE Sector L	Energy consumption in GWh per million EUR of revenue of investee companies - NACE Sector L (Real estate activities)	100.00	93.70%
Biodiversity	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	17.58%	93.70%
Emissions to water	Tons of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00 t/Meur	2.79%
Hazardous waste	Tons of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	0.39 t/Meur	93.70%
Water usage and recycling	Average amount of water consumed and reclaimed by the investee companies (in cubic meters) per million EUR of revenue of investee companies	0.00 t/Meur	2.79%
Violations of UNGC/OECD	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%	96.17%
Processes to monitor UNGC / OECD compliance	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.31%	93.70%
Gender pay gap	Average unadjusted gender pay gap of investee companies	9.03%	62.52%
Board gender diversity	Average ratio of female to male board members in investee companies	20.77%	93.70%
Controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%	93.70%
Excessive CEO pay ratio	Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest-compensated individual)	194.03	27.56%
Greenhouse gas intensity (sovereign and supranational)	GHG intensity of investee countries (tons of CO2e emissions per million EUR of the country's GDP)	766.79	96.89%
Social violations (sovereign and supranational)	Number of investee countries subject to social violations (as an absolute number and in proportion to the total number of countries receiving investments), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0	96.89%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund makes sustainable investments whereby a minimum of 10% of the Sub-Fund's net assets, are invested in shares of companies that are aligned with relevant United Nations Sustainable Development Goals (SDGs). The minimum levels of sustainable investments with environmental and social objectives are respectively 1% and 3% of the Sub-Fund's net assets.

As mentioned above, alignment is defined for each investment / investee company by meeting at least one of the following three thresholds:

a) Products and services: derive at least 50% of their revenue from goods and services that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or

b) Capital expenditure: invest at least 30% of their capital expenditure in business activities that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or

c) Operations:

i. the company achieves an “aligned” status for operational alignment for at least three (3) out of all seventeen (17) of the SDGs, based on the evidence provided by the investee company of available policies, practices and targets addressing such SDGs. An “aligned” status represents an operational alignment score of ≥ 2 (on a scale of -10 to +10) as determined by the external scoring provider; and

ii. the company does not achieve a “misaligned” status for operational alignment for any SDG. A company is considered “misaligned” when its score is ≤ -2 (on a scale of -10 to +10), as determined by the external scoring provider.

These thresholds represent a significant intentionality of the company in regards to the contributing activity.

As of 31/12/2025, the Sub-Fund had 43.69% of the portfolio's net assets invested in sustainable investments as per our definition above mentioned on average based on the end of quarter data. The minimum levels of sustainable investments with environmental and social objectives were respectively 23.21% and 20.48% of the Sub-Fund's net assets on average based on the end of quarter data.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We used the following mechanisms to ensure our sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

1) Universe reduction process:

i) Firm-wide exclusion: Negative screening and exclusions of unsustainable activities and practices are identified using an international norms and rules-based approach on the following: (a) controversies against the OECD business guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and UN Global compact principles, (b) controversial weapons, (c) thermal coal mining, (d) power generation companies, (e) tobacco, (f) adult entertainment.

ii) Fund-specific negative screening Extended activity or stricter exclusion criteria cover gambling, alcohol, companies involved in factory farming, palm oil and companies on the People for the Ethical Treatment of Animals ('PETA') list. In addition, corporate bonds with an overall START rating of “D” or “E” (rating from 'E' to 'A') are excluded of the Sub-Fund's investment universe. Companies having a START rating of E (rating from 'E' to 'A') on environmental or social pillars are excluded of the Sub-Fund's investment universe. Companies having an overall MSCI rating of 'CCC' or 'B' (rating from 'C' to 'AAA') are a priori excluded of the Sub-Fund's investment universe. Companies rated “CCC” or ‘B’ on the overall MSCI rating (from “E” to “A”) can reintegrate into the Sub-Fund's investment universe if START rating is C or above.

The equity universe is further reduced by extended activity or stricter exclusion criteria cover oil and gas, power generation, thermal coal mining, weapons and the number of companies deemed not aligned according to our SDG alignment assessment, as described above.

2) Active stewardship: ESG-related company engagements contributing to better awareness or improvement in companies' sustainability policies are measured by following indicators: (a) level of active engagement and voting policies, (b) number of engagements, (c) rate of voting and (d) participation at shareholder and bondholder meetings.

How were the indicators for adverse impacts on sustainability factors taken into account?

According to Carmignac approach defined, the Principal Adverse Impacts indicators have been monitored on a quarterly basis. Adverse impacts are identified for their degree of severity. After internal discussion an action plan is established including a timeline for execution. Company dialogue is usually the preferred course of action to influence the company's mitigation of adverse impacts, in which case the company engagement is included in the quarterly Carmignac Engagement plan according to the Carmignac Shareholder Engagement policy. Disinvestment may be considered with a predetermined exit strategy within the confines of this aforementioned policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights ?

Carmignac applied a controversy screening process on OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights for all its investments across all Subfunds.

Carmignac acts in accordance with the United Nations Global Compact (UNGC) principles, the United Nations Guiding Principles on Business and Human Rights (UNGPR), the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work, and the Organisation for Economic Co-operation and Development (OECD) guidelines for multinational enterprises to assess companies' norms, including but not limited to human rights abuses, labour laws and standard climate related practices.

This Sub-Fund applied a controversy screening process for all of its investments. Companies that have committed significant controversies against the environment, human rights and international labour laws to name the key infractions are excluded. This screening process bases the identification of controversies on the OECD Business Guidelines and UN Global compact principles and is commonly called norms-based screening, integrating a restrictive screening monitored and measured through Carmignac's proprietary ESG system START. A company controversy scoring and research is applied using data extracted from ISS ESG as the research data base.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Carmignac has committed to apply the SFDR level II 2019/2088 Regulatory Technical Standards (RTS) annex 1 whereby 14 mandatory and 2 optional environmental and social indicators will be monitored to show the impact of such sustainable investments against these indicators: Greenhouse gas emissions, Carbon footprint, GHG intensity (investee companies), Exposure to companies in fossil fuel sector, Non-renewable energy consumption and production, Energy consumption intensity per highimpact climate sector, Activities negatively affecting biodiversity-sensitive areas, Emissions to water, Hazardous waste ratio, Water usage and recycling, Violations of UN Global Compact principles or OECD Guidelines for Multinational Enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact and OECD Guidelines for Multinational Enterprises, Unadjusted gender pay gap, Board gender diversity, Exposure to controversial weapons, Excessive CEO pay ratio. In addition and where applicable, sovereign bond indicators: social violence and GHG intensity can also be monitored.

As part of its PAI strategy, Carmignac identifies companies that underperform the benchmark in terms of PAI Indicators. Our third party data provider, MSCI enables us to monitor the impact of our funds for each PAI.

The PAI values of the fund are compared to the values of the benchmark. When the fund PAI underperforms the benchmark PAI by a certain threshold, we look for the issuers that are the main contributors to the underperformance of the given PAI. Those companies are considered outliers.

Identifying outliers for each PAI indicator enables us to engage, when relevant and material, with companies in order to ensure they are committed to reducing their impact.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

What were the top investments of this financial product?

Investment	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR	Information Technology	8.03%	Taiwan
POLAND 2.00% 25/08/2036	Sovereign Debt	7.11%	Poland
CENTRAIS ELETRICAS BRASILEIRAS SA	Utilities	4.17%	Brazil

Please find above the average top investments of the portfolio based on quarter end data for 2025.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

A minimum proportion of 90% of the investments of this Sub-Fund is used to meet the environmental or social characteristics promoted by the financial product in accordance with the binding elements of the investment strategy. In 2025, 99.77% of issuers have been covered by the ESG analysis thus 99.77% of issuers were aligned with these E/S characteristics, on average, based on 4 quarters ends data.

Minimum Proportion of sustainable investments:

The Sub-Fund makes sustainable investments whereby a minimum of 10% of the Sub-Fund's net assets are invested in shares considered aligned with relevant United Nations Sustainable Development Goals ("the SDGs"). In 2025, this positive screening has been applied and 43.69% of the Sub-Fund's net assets were invested in shares of companies in relation to business activities which align positively with one of the 17 United Nations Sustainable Development Goals.

The minimum levels of sustainable investments with environmental and social objectives are respectively 1% and 3% of the Sub-Fund's net assets. In 2025, 23.21% of the Sub-Fund's net assets were invested in sustainable investments with environmental objectives, and 20.48% in sustainable investment with social objectives. In addition, 1.64% of the Sub-Fund's net assets were invested in labelled debt, on average based on 4 quarters ends data.

The #2 Other investment (in addition to cash and derivatives which may be used for hedging purposes, if applicable) are equity, corporate bonds or sovereign bonds investments which are not used to achieve the environmental or social characteristics promoted by the Sub-Fund. They are investments made strictly in accordance with the Sub-Fund's investment strategy and have the purpose of implementing the Sub-Fund's investment strategy. All such investments are made subject to ESG analysis (including through our ESG proprietary sovereign model for sovereign bonds) and for equity and corporate bonds are subject to a screening of minimum safeguards to ensure that their business activities are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In 2025, this proportion is 0.23% of the net assets of the Fund.

In which economic sectors were the investments made?

Please find below the average top sectors based on quarter end data for 2025 of the portfolio. The top sectors are rebased based on eligible assets which are corporate and sovereign issuers.

Economic sectors	Weight
Sovereign Debt	46.2%
Information Technology	13.35%
Financials	11.53%
Consumer Discretionary	10.23%
Utilities	4.73%
Energy Equipment & Services	3.52%
Real Estate	3.17%
Industrials	2.97%
Materials	1.48%
Telecommunication Services	0.83%
Health Care	0.77%
Consumer Staples	0.7%
Oil, Gas & Consumable Fuels	0.5%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The Sub-Fund does not have an EU taxonomy alignment objective. As of 31/12/2025, the alignment with the EU Taxonomy is 1.41%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouses gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2024, 0% of the sustainable investments with an environmental objective were aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

In 2025, 21.80% of the Sub-Fund's net assets were invested in sustainable investments with environmental objectives not aligned with the EU Taxonomy, on average, based on 4 quarters ends data.

What was the share of socially sustainable investments?

In 2025, 20.48% of the Sub-Fund's net assets were invested in sustainable investments with social objectives, on average, based on 4 quarters ends data.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining portion of the portfolio (outside the minimum proportion of 90%) may also promote environmental and social characteristics but are not systematically covered by ESG analysis. Such assets may include unlisted securities or securities that have been subject to an initial public offering, the ESG analysis of which may be carried out after the acquisition of said financial instrument by the sub-fund. Cash (and cash equivalent), as well as derivatives (used either for hedging purposes) are also included under "#2 Other".

In addition, the do no significant harm, exclusionary process and adverse impacts are monitored for all the Sub-Funds' assets.

At issuer level (for equities and corporate bonds), non sustainable assets are examined for adherence to global norms on environmental protection, human rights, labor standards and anti-corruption, through controversy ("norms-based") screening. The investments are subject to a screening of minimum safeguards to ensure that their business activities are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Environmental, social and governance considerations are integrated in synthetic instruments through the derivatives framework detailed below. The approach will depend on the type of derivatives instrument used by the Sub-Fund: single name derivatives or index derivatives.

Single name derivatives

Derivatives with a short exposure to a single underlying security do not go through an additional ESG related checks. The underlying issuer may be present in the Sub-Fund's exclusion lists on the basis that signalling a lack of confidence in a business with poor ESG characteristics through shorting their security(ies) is considered reasonable in the pursuit of balancing shareholders' investment objectives. Such derivatives are not subject to a START rating.

Derivatives with a long exposure to a single underlying company or issuer are subject to the same ESG integration policy as physical long equity and/or corporate debt positions, as applicable. These instruments must satisfy the same ESG integration and criteria, as described in this annex.

Index derivatives Index derivatives, whether with a long or short exposure, may go through additional checks to ensure they are suitable for the Sub-Fund, depending on their purpose.

- Hedging and efficient portfolio management purposes:
 - index derivatives purchased for hedging purposes are not analysed for ESG purposes.
- Exposure purposes: index derivative may be purchased by the Sub-Fund for exposure to the extent it meets the following characteristics, if it is to be held for more than one month

- Concentrated index (5 or less components in the underlying index): The index must not have any of its components in the Sub-Fund's exclusion list.
- Broad-based index (more than 5 components): the index must be composed in significant majority (>80% in exposure) of companies that are not in the Sub-Fund's exclusion list.

In addition, the weighted average ESG rating of the index must be above BBB (MSCI) or C (START), and the ESG coverage of the index (either MSCI or START) must be greater than 90%. The reference indicator of the Sub-Fund remains out of scope of this index derivatives framework, and is not considered for ESG purposes. The Sub-Fund applies compensation calculation (netting of a long position with an equivalent issuer short positions using derivatives) for the purpose of measuring adverse impacts. 100% of the sub-fund's assets (excluding cash and derivatives) apply negative sectorial and norms-based screens and exclusions ensuring minimum environment and social safeguards.

In addition, the do no significant harm, exclusionary process and adverse impacts are monitored for all the Sub-Funds' assets.

In 2025, no derivatives were used to attain the Environmental and/or Social characteristics promoted by the Sub-Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The below listed actions were conducted at Carmignac in 2025 in order to support our overall investment process in meeting environmental /social characteristics :

ESG Integration

In 2025, we introduced a new ESG framework to assess sovereign debt. The model incorporates +25 E/S/G indicators applicable to both Developed and Emerging Markets. The model aims to inform investment decisions and better integrate ESG considerations into our sovereign exposure. The model uses a range of quantitative data from third party sources and incorporates a qualitative adjustment performed by the Fixed Income Investment Team in collaboration with the ESG Analysts. The model aims to reduce income bias by incorporating the Kuznet Overlay. The final score is used to inform the investment decisions and align with the ESG commitments of the funds in scope.

In 2025, we have also increased the % universe reduction of some of our funds from 25% to 30% to meet the requirements of the French ISR Label.

We have also updated our proprietary ESG Rating system, START. The revamped system, referred to as START 2.0, now includes 80 ESG indicators, up from ~30 indicators previously. The new indicators, including forward-looking and market sentiment data, will provide a more comprehensive view of ESG risks and opportunities for companies being analysed. We have also enriched the model with traditional ESG indicators which have grown in relevance since the first version of the proprietary model was released in 2020; examples of such indicators include: scope 3 emissions, historical CO2 reduction trajectories, SBTi approved targets, biodiversity metrics, etc

Transparency

We have continued to provide comprehensive information as to our ESG approach, policies and reports on the Carmignac website: <https://www.carmignac.com/en-fr/sustainable-investment/overview>

In our 2025 TCFD report, we have continued to provide more clarity around various climate metrics, such as Climate VAR and transition and physical risks metrics. Our latest TCFD report is available on our website: https://carmidoc.carmignac.com/SRICA_FR_en.pdf

We have also fine tuned our exclusions policy to include new sectors such as Nuclear Power Producers for certain funds in scope. Our exclusion policy can be accessed at https://carmidoc.carmignac.com/SRIEXP_FR_en.pdf.

Finally, we have also published our 2025 UNPRI Assessment, where Carmignac received a 5-star rating. The full report is available on Carmignac website.

Stewardship

Voting: in 2025 we succeeded in voting in 96% of all the votable meetings

Stewardship code: We were once again approved by the FRC as a signatory of the Stewardship Code by complying with all principles, as formalised in our annual Stewardship Report: https://carmidoc.carmignac.com/SWR_FR_en.pdf

Regulatory Consultations: We participated in several industry or regulatory-led consultations with local industry bodies or the European Commission on topics such as defence, energy, SFDR, ESMA and sustainability labels.

Carmignac sees value in both direct and collaborative engagement, and it is the combination of both which leads to the most influential and effective stewardship. It is by joining forces that investors can most effectively influence investee companies on material ESG issues, including market-wide and systemic risks, and ultimately help improve the functioning of markets. With this in mind, we have increased our involvement with Climate 100+, in particular for the collective engagement with Pemex as bondholder of the company. .

More specifically regarding engagements, our fiduciary responsibility involves the full exercise of our rights as shareholders and engagement with the companies in which we are invested. Dialogue is maintained by financial analysts, portfolio managers and ESG team. We believe that our engagement leads to a better understanding of how companies manage their extra-financial risks and significantly improve their ESG profile while delivering long-term value creation for our clients, society and the environment. Our engagement may concern one of five considerations: 1) ESG risks, 2) an ESG theme, 3) a desired impact, 4) controversial behaviour, or 5) a voting decision at a General Meeting. Carmignac may collaborate with other shareholders and bondholders when doing so would help influence the actions and governance of companies held in the portfolio. In order to ensure that the company correctly identifies, foresees and manages any potential or confirmed conflict of interest situation, Carmignac has put in place and maintains policies and guidelines. For more information on our engagement policies, please visit the website.

In 2025, we conducted 111 engagements at Carmignac level, and with 10 companies in this particular fund.

Carmignac engaged with PEMEX in 2025 regarding the recent governance reforms, emerging opportunities and strategic plans following the legislative changes in Mexico, as well as the company's environmental performance and transition strategy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

- **How does the reference benchmark differ from a broad market index?**
Not Applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not Applicable.
